

"I would just like to say thank you for a great course. Both myself and Ted will find what we have learnt from you invaluable going forward as we try to implement Scrum at our company and you have fuelled the "fire" in us to get things moving."

Steve,

.....

"I wanted to reach out and tell you how valuable I found your Scrummaster course in Halifax."

Geof | Halifax

.....

"Thank you Joe and Cassandra for teaching and organizing the class. It was a great experience and opened my eyes to a lot of new, interesting and effective techniques. I did the exam this morning and passed so I am now a fully certified Scrum Master. Time to change the world!"

Khizar | Montreal

.....

"I cannot express how valuable this training was for me. I have already implemented 5 of the best practices you outlined during the class. And in only 3 days it has already started working. Before I was trained I would have to begrudgingly "drag" the developers away from their desk for, admittedly, less than engaging grooming sessions. However on Friday one developer asked if we could start recording grooming sessions for vacationing teammates because with the new format so much valuable information is exchanged everyone should have the opportunity to hear the discussion first hand. WOW! Who knew the process of planning is more important than the plan itself? ;0)"

NO NAME

.....

"Thanks again for the awesome course!"
